

VOLVO WHEEL LOADERS

L30G, L35G

5.5-6.25 t (11,000 - 12,500 lbs) 75hp

A PASSION FOR PERFORMANCE.

At Volvo Construction Equipment, we're not just coming along for the ride. Developing products and services that raise productivity – we are confident we can lower costs and increase profits for industry experts. Part of the Volvo Group, we are passionate about innovative solutions to help you work smarter – not harder.

Helping you to do more

Doing more with less is a trademark of Volvo Construction Equipment. High productivity has long been married to low energy consumption, ease of use and durability. When it comes to lowering life-cycle costs, Volvo is in a class of its own.

Designed to fit your needs

There is a lot riding on creating solutions that are suited to the particular needs of different industry applications. Innovation often involves high technology – but it doesn't always have to. Some of our best ideas have been simple, based on a clear and deep understanding of our customers' working lives.

You learn a lot in 180 years

Over the years, Volvo has advanced solutions that have revolutionized the use of construction equipment. No other name speaks Safety louder than Volvo. Protecting operators, those around them and minimizing our environmental impact are traditional values that continue to shape our product design philosophy.

We're on your side

We back the Volvo brand with the best people. Volvo is truly a global enterprise, one that is on standby to support customers quickly and efficiently – wherever they are.

We have a passion for performance.

A strong, dedicated, capable dealer network.

Our dealers are strategically located throughout North America to provide the equipment you need and the parts and service support you demand for a productive and profitable operation.

The strength of our dealer network is enhanced with extensive individualized product and product support training at our state-of-the-art Technical Training Center in Asheville and through hands-on training. At our nearby 80-acre Product Demonstration Center, visitors operate equipment from our entire product line under a variety of simulated working conditions. Both facilities are in year-round use by our dealers and customers – more than 2,000 visit each year. **Building the best starts right here.**

The products designed and manufactured by Volvo Construction Equipment have their beginnings at the most advanced Research & Design centers in the industry. Volvo CE machines are designed in 11 R&D centers and produced in 15 manufacturing facilities across the world.

The major R&D center and manufacturing plant in the Americas is located in Shippensburg, Pennsylvania. This facility has been in operation for over 30 years and – with its recently added 200,000 sq. ft. expansion – now covers 570,000 sq. ft. on an 80 acre campus. Dedicated work teams and highly advanced technologies and techniques using the Volvo Production System ensure continuous quality improvements, labor savings and cost control to reach the high quality that our customers have come to expect from Volvo.

PERFORMANCE THAT WON'T QUIT.

For demanding jobs, you need a reliable all-rounder to work as hard as you do. The Volvo L30G and L35G include the features necessary for maximum power and performance. We've kept the best elements from previous models but improved on our classics with new features - making the G-Series even more fuel efficient.

Dual hydraulics

Two independent hydraulic systems allow the operator to steer and lift at the same time without one function diminishing the other - for improved performance and faster cycle times.

Differential locks

Volvo differential locks distribute power equally to all four wheels at the push of a button, reducing tire slippage and boosting traction to prevent skid marks, tire wear and damage to surfaces.

Hydrostatic drive system

Thermostatically controlled hydraulics enables quick warm-up and efficient operation of hydrostatic drive and working hydraulics. Hydrostatic drive allows attachments to be used at low travel speed and high engine RPM.

Unique portal axles

The Volvo L30G and L35G feature portal axles for the highest ground clearance in their class. Their unique design protects the axles and propeller shaft even in the toughest environments, allowing the machine to pass over rough terrain and obstacles without risk of harm to the vehicle's underside.

POWERFUL BY DESIGN.

Compact design

Transversally mounted engines help make the L30G and the L35G as compact as possible - with a short turning radius and good maneuverability, even in tight spaces.

It's the details that count — and with the Volvo G-Series, thoughtful, intuitive design is standard. From the compact body style that improves maneuverability to the articulating oscillating joint that keeps everything level, G-series loaders are full of features that boost productivity, durability and efficiency.

Articulating oscillating joint

The articulating oscillating joint improves maneuverability, stability and maintains 100% ground contact in rough terrain, providing operator comfort and superior steering capability.

Breakout force

Superior breakout, rim pull and lifting forces work together to deliver efficient performance and even greater productivity.

Z-bar linkage

Field-proven Z-bar linkage offers high breakout force and fast cycle times, as well as excellent parallel movement - resulting in better productivity, power and control.

THE PERFECT BUSINESS PARTNER.

Imagine a machine that makes your working life simpler. With the Volvo G-Series, operability is easier and more intuitive, and service checks are quicker. Because the less time you spend on maintenance and the more at ease you are behind the wheel, the more time you can spend on the job.

Volvo Care Cab

The spacious, industry-leading Volvo cab, ROPS and FOPS certified offers exceptional all-around visibility, along with low noise and vibration levels - for greater comfort and safety.

Joystick

The intuitive, easy-to-use joystick controls the machine's operations, with third and fourth functions integrated into a single joystick as an option.

Display and console

The redesigned ergonomic display keeps you informed with all-important machine information.

Service access

Both units offer easy ground level access to service points, including fuel, air, hydraulic and oil filters, radiator, oil dipstick, hydraulic oil level gauges and battery.

Electronically controlled engine

The new Volvo engine is electronically controlled for excellent fuel efficiency and increased torque at low RPM. And the engine is more environmentally friendly, meeting Tier 4 Final emissions regulations.

Analysis software

Monitor machine uptime with Volvo's diagnostic analysis software. MATRIS analyzes operational data from the machine's electronic control unit, while VCADS Pro can adjust machine function according to the results.

THE MULTITALENTED L30G/L35G.

Volvo Care Cab

Industry-leading Volvo cab with excellent all-around visibility, ergonomic controls and a comfortable, spacious interior. ROPS and FOPS certified.

Hydrostatic drive system

Hydraulic attachments operate at low travel and high engine speeds. Thermostat prevents overheating and shortens warm-up for efficient attachment performance.

Z-bar linkage

Offers high breakout force and cycle times with excellent parallel movement with Volvo attachments for good control and maneuverability.

Articulating oscillating joint

Provides easy maneuverability in rough terrain by keeping all wheels on ground as well as hydraulic hose protection.

Differential locks

Switch activated 100% differential locks transfer power equally to all wheels and reduce tire slippage for maximum traction on soft ground.

Integrated quick coupler

Fully integrated hydraulic quick coupler makes switching between attachments fast and easy.

Complete Solutions

Volvo provides the right solutions throughout the entire life cycle of your machine to lower total cost of ownership.

Compact design

The most compact machine design possible for a short turning radius, excellent maneuverability and stability in tight areas.

Service access

The transverse engine design provides easy access to service points under the hood for quick maintenance checks.

Tier 4 Final engine

Powerful electronic-controlled engine for high fuel efficiency. Meets Tier 4 Final emissions requirements.

Unique portal axles

Uniquely designed for high ground clearance to protect the axles and propeller shaft from damage.

Dual hydraulics

The powerful dual hydraulics system promotes faster cycle times.

ADDING VALUE TO YOUR BUSINESS.

Being a Volvo customer means having a complete set of services at your fingertips. Volvo can offer you a long-term partnership, protect your revenue and provide a full range of customer solutions using high quality parts, delivered by passionate people. Volvo is committed to increasing the positive return on your investment and maximizing uptime.

Customer Support Agreements

The range of Customer Support Agreements offer preventive maintenance, total repairs and a number

of uptime services. Volvo uses the latest technology to monitor machine operation and status, giving you advice to increase your profitability. By having a Customer Support Agreement you are in control of your service costs.

Genuine Volvo Parts

Our attention to detail is what makes us stand out. This proven concept acts as a solid investment in your machine's future. Parts are extensively tested and approved because every part is vital for uptime and performance. Only by using Genuine Volvo Parts, can you be sure that your machine retains the renowned Volvo quality.

Service Network

In order to respond to your needs faster, a Volvo expert is on the way to your job site from one of our Volvo facilities. With our extensive infrastructure of technicians, workshops and dealers, Volvo has a comprehensive network to fully support you using local knowledge and global experience.

Complete Solutions

Volvo has the right solution for you. So why not let us provide all your needs throughout the whole life cycle of your machine? By listening to your requirements, we can reduce your total cost of ownership and increase your revenue.

FLEXIBILITY IN EVERY APPLICATION.

Volvo knows wheel loaders - after all, we've been producing them since 1954. With nearly 60 years of experience, we understand what our customers need to get the job done. That's why we offer a variety of highly adaptable attachments, to make the G-Series even more versatile.

Volvo attachments

From forks and buckets to material handling arms, Volvo offers a wide range of attachments to make the G-Series even more comprehensive and flexible. Volvo attachments are perfectly matched to a machine's linkage, hydraulics and driveline for superior productivity.

Z-bar linkage

Field-proven Z-bar linkage offers high breakout force and fast cycle times, as well as excellent parallel movement using the Volvo attachments - resulting in better productivity, power and control.

VOLVO L30G, L35G IN DETAIL.

Engine

Volvo 4-cylinder diesel engine with turbocharger, watercooled. Compliant to Tier 4 environmental regulations. Cooled Exhaust Gas Recirculation (EGR), diesel particulate filter (DPF) and electronic throttle pedal. Maximum engine incline is 30 degrees in all directions.

Air cleaning:

1. Paper filter with indicator in cab
2. Safety filter

		L30G	L35G
Engine	Volvo	D3.3D	D3.3D
Gross power at	r/min	2,600	2,600

Max torque at	r/min	1,500	1,500
SAE J1349 netto	Nm/lbf	265/ 195.5	265/ 195.5
Displacement	cm³/in³	3 300/ 201.4	3 300/ 201.4

Electrical system

		L30G	L35G
Voltage	V	12	12
Battery capacity	Ah	100	100
Alternator rating	W / Ah	12/90	12/90
Starter motor output	kW/hp	3kW/ 4hp	3kW/ 4hp

Drivetrain

Transmission: hydrostatic transmission, full power shift under load, both when changing direction (forward and reverse) and between ranges. Maximum drawbar force can be achieved in all ranges. "Inch/brake pedal" for variable machine speed control and power transfer to bucket hydraulics at constant engine rpm.

Multi-function lever for change of direction, differential lock and use of the servo-control.

Axles: all-wheel drive by two rigid portal axles.

Differential locks: hydraulically actuated 100% differential locks in both axles. Frame: solid front and rear frame, robot-welded. Articulating oscillating joint for optimum maneuverability and traction.

		L30G	L35G
Oscillation at wheel, max.	mm	250	270
	in	10"	11"
Track	mm	1 482	1 482
	ft/in	4' 10"	4' 10"
Angle of oscillation	°	±10	±10
Tire		405/70 R18	405/70 R20
Maximum speed		High Speed	High Speed
1st range forward/reverse	km/h	8	8
	mph	5	5
2nd range forward/reverse	km/h	30	30
	mph	19	19

Brake system

Service brake: reliable dual braking system, acting upon all four wheels.

1. Wear-free, hydrostatic inching brake

2. Central friction brake, actuated via "inch/brake pedal". First stage of pedal application actuates the inching facility, the last third of pedal application applies the central friction brake.

Parking brake: Mechanically activated central drum brake, acting upon all four wheels.

Steering system

Hydrostatic steering. Central articulating-oscillating joint with damping effect.

Angle of articulation ±40°

Steering pump: gear pump

		L30G	L35G

VOLVO CONSTRUCTION EQUIPMENT

Volvo Construction Equipment is different. Our machines are designed, built and supported in a different way. That difference comes from an engineering heritage of over 180 years. A heritage of thinking first about the people who actually use the machines. About how to help them be safer, more comfortable, more productive. About the environment we all share. The result of that thinking is a growing range of machines and a global support network dedicated to helping you do more. People around the world are proud to use Volvo. And we're proud of what makes Volvo different.

Not all products are available in all markets. Under our policy of continuous improvement, we reserve the right to change specifications and design without prior notice. The illustrations do not necessarily show the standard version of the machine.
