

# Logix Processor (LXP<sup>®</sup>)

## FEATURES

- 1 Jaw change-outs in 15 minutes with the coupler style connection system, hydraulically activated lock pin, jaws that stay intact and a stand with every jaw set – safe, easy and fast
- 2 Proprietary regeneration valve improves cycle time by up to 33% compared to standard hydraulic systems
- 3 Patented pivot system provides a power curve to match the jaw's primary application. Each jaw's pivot group stays intact, allowing the use of a press fit design for a stronger, more durable product.
- 4 Heavy-duty pivot design with recessed caps provides structural strength and long-term durability
- 5 Reverse mounted cylinders protect the rods from debris
- 6 Enclosed structure adds strength and rigidity while protecting the cylinders

### Shear Jaws:

- 7 Patented bolt-on piercing tip is replaced in minutes without grinding or welding
- 8 Exclusive dual guide blade system accommodates heat expansion at the tip while maintaining tighter tolerances where the primary cutting blades pass (300 - 800 models only)
- 9 Four-way indexable guide blades, razor blade and primary blades provide four useable cutting edges

### APPLICATIONS

- Demolition
- Structural Steel
- Wire
- Copper
- Bridge Demolition
- Rebar
- Aluminum

LXP 800 CC	17,600	71	50			
LXP 800 CP	17,720	61	39			

\*Weight includes mounting bracket to attach to excavator.

\*\*Distance is measured from the attachment mounting pivot (boom or stick) forward.

Genesis Logix Processors are covered by a 12-month, 1,500-hour (whichever occurs first) warranty.

Genesis reserves the right to continually make product improvements designed to positively enhance performance.

## Cracker Jaws

200 - 500

### APPLICATIONS

- Concrete Recycling
- C&D Processing
- Rebar
- Demolition

### FEATURES

- 1 Teeth are easy to change and fully protect the parent material, eliminating the need for build-up and hard-surfacing (200 - 500 models only)
- 2 Bolt-on teeth and blades reduce maintenance and downtime (800 model only)
- 3 Cracker tips concentrate force for a greater ability to crush through heavy concrete
- 4 Indexable blades provide two useable cutting edges
- 5 Patented pivot geometry creates peak power when jaw is fully open, where it's most needed to crush large concrete

## Pulverizer Jaws

200 - 500

### APPLICATIONS

- Demolition
- Concrete Recycling
- C&D Processing
- Rebar

### FEATURES

- 1 Bolt-on tooth bed features a fully replaceable crushing surface, eliminating the need for welding (200 - 500 models only)
- 2 Bolt-on teeth reduce maintenance and downtime (800 model only)
- 3 Patented pivot geometry creates peak power when jaws are fully open, where it's most needed to crush concrete
- 4 Tooth profile maximizes crushing force, pulverizing concrete from rebar like no other processor
- 5 Extended wear plates aid in positioning concrete for processing

## Jaw Stands

### Weight:

LXP 200 & 300: 680 lbs.

LXP 400 & 500: 780 lbs.

LXP 800: 1,100 lbs.
